Billing and Collections System - Proposal v1.0

Prepared for Kestrel Hardware Distributors, 2 October 2026

1. Overview

Kestrel supplies hardware to around 200 retail shops. Billing is done on paper and collections are tracked in a notebook. This proposal covers a simple billing and collections system for the office and delivery staff.

2. Users

The system will support 5 staff users: 1 owner, 2 billing staff and 2 delivery staff.

- The owner can see all invoices, collections and reports.
- Billing staff create invoices and record payments.
- Delivery staff see the invoices for their route.

3. Invoicing and payments

- Create GST invoices from the product list.
- Record customer payments in cash only.
- Each invoice is marked Paid in full when the cash is received.
- All payments are recorded in a single collections account.
- Print invoices on A4 paper.

4. Reports

- Daily collections report, downloadable as PDF.
- Outstanding invoices list for each customer.

5. Notifications

Customer notifications are not included in this phase.

6. Out of scope

- Online payments and payment gateways.
- WhatsApp or SMS messages to customers.
- Integration with accounting software.

7. Commercials and timeline

Shared separately after the scope is confirmed.
